Dear Mr Miller:

The San Pedro River in SE Arizona is very important to wildlife particularly nesting an migratory birds. Furthermore birders from all parts of the world visit this area and therefor it has a positive economic impact on the region.

The proposed Villages at Vigneto development in Benson would have a huge negative impact on the river and it's surroundings by depleting water levels in the river. Thanks you re-evaluating the prior 404 permit. Pleas conduct a complet Envirnomental Impact Statement(EIS) and consult with the US Fish & Wildlife Service as well as the EPA regarding the impact of this project on wildlife in SE Arizona.

Yours truly

Craig Thayer
